

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (previously presented) An apparatus for a computerized trading system comprising:
 - a logic engine comprising an algorithm for implementing a trading strategy; and
 - an interface comprising a first sub-interface and a second sub-interface, wherein:
 - said first sub-interface allows a user to modify said algorithm by changing a mapping between an event and an action;
 - said second sub-interface allows the user to review details of orders executed by the logic engine; and
 - said interface allows the user to navigate among said first and second sub-interfaces.
- 2-4. (canceled)
5. (original) The apparatus of claim 1 wherein said interface comprises a graphical user interface.
6. (original) The apparatus of claim 1 wherein said first sub-interface comprises a graphical user interface.
- 7-10 (canceled)
11. (previously presented) The apparatus of claim 1 wherein:
 - said interface further comprises a third sub-interface which allows the user to monitor operation of a server computer that executes the logic engine; and
 - said interface allows the user to navigate among said first, second and third sub-interfaces.
12. (previously presented) A method for computerized trading comprising:
 - providing a logic engine with an algorithm for implementing a trading strategy;

- providing an interface that includes a first sub-interface and a second sub-interface;
- using the first sub-interface to modify said algorithm by changing a mapping between an event and an action;
- processing a trade using said logic engine with said modified algorithm; and
- using the second sub-interface to review details of orders executed by the logic engine.

13 (canceled)

14. (previously presented) An interface used in a computerized trading system, said interface comprising:

a first sub-interface for modifying an algorithm by changing a mapping between an event and an action, said algorithm used in said computerized trading system to implement a trading strategy; and

a second sub-interface for reviewing details of orders executed by the computerized trading system;

wherein said interface allows a user to navigate among said first and second sub-interfaces.

15. (canceled)

16. (previously presented) The interface of claim 14 wherein said interface comprises a graphical user interface.

17. (previously presented) The apparatus of claim 1, wherein the trading strategy is selected from the group consisting of:

- (a) a Volume-Weighted-Average-Price strategy;
- (b) a Ratio strategy;
- (c) a Gamma Hedge strategy;
- (d) an Iceberg strategy; and
- (e) a CB Delta Hedge strategy.

18. (previously presented) The apparatus of claim 1, wherein the first sub-interface includes an event editor interface, a condition editor interface and an action editor interface.

19. (previously presented) The method of claim 12, wherein said interface also includes a third sub-interface, and the method further comprising:

using said third sub-interface to monitor operation of a server computer which executes the logic engine.

20. (previously presented) The method of claim 12, wherein the trading strategy is selected from the group consisting of:

- (a) a Volume-Weighted-Average-Price strategy;
- (b) a Ratio strategy;
- (c) a Gamma Hedge strategy;
- (d) an Iceberg strategy; and
- (e) a CB Delta Hedge strategy.

21. (previously presented) The method of claim 12, wherein the first sub-interface includes an event editor interface, a condition editor interface and an action editor interface.

22. (previously presented) The interface of claim 14, wherein:

said interface also includes a third sub-interface for monitoring operation of the trading system; and

said interface allows a user to navigate among said first, second and third sub-interfaces.

23. (previously presented) The interface of claim 14, wherein the trading strategy is selected from the group consisting of:

- (a) a Volume-Weighted-Average-Price strategy;
- (b) a Ratio strategy;
- (c) a Gamma Hedge strategy;
- (d) an Iceberg strategy; and
- (e) a CB Delta Hedge strategy.

24. (previously presented) The interface of claim 14, wherein the first sub-interface includes an event editor interface, a condition editor interface and an action editor interface.

25. (new) The apparatus of claim 1, wherein said action is placement of a securities trading order.

26. (new) The method of claim 12, wherein said action is placement of a securities trading order.

27. (new). The interface of claim 14, wherein said action is placement of a securities trading order.
